OBJECTIVE

Experienced IT professional adept in IT help desk support, network security, and full-stack web development. With a demonstrated history of optimizing technical systems and enhancing user experiences, I am seeking a challenging role where I can leverage my skills to contribute to enterprise success. Committed to staying at the forefront of technological advancements, I strive to deliver efficient solutions and drive continuous improvement in IT and web development practices.

PROFESSIONAL SUMMARY

- Proven track record in IT Help Desk support, adept at troubleshooting and resolving technical issues promptly.

- Skilled in securing and maintaining devices and networks to ensure optimal performance and data integrity.

- Experienced full-stack developer proficient in PHP (Laravel), Vue.js, and React.js, with a focus on creating scalable and efficient web applications.

- Competent in managing Linux servers, utilizing Git for version control, and Docker for streamlined deployment processes.
